# CALCIUM NEW BOLUS

AVAILABLE IN STORE NOW & ONLINE

Includes 4 sources of calcium for optimal response

Added vitamin D3 to increase calcium utilisation

Added zinc to help support a healthy immune system

Blinding protein for increased calcium absorption

Selenium to support a healthy immune system & reduce retained cleansings

Iodine to aid post-calving recovery

## Feed Advice:

Country UF Calcium Bolus uses multi release calcium sources with added trace elements and vitamins to help support a healthy immune system and reduce the risk of milk fever in dairy cows. The unique mixture of calcium sources provides a slow, medium and rapid release as well as a protected supply of calcium. This delivers a fast, precise and a resilient option when it comes to calcium supplementation.

## Administration:

- Give one bolus per cow at first signs of calving.
- Give a second bolus if required 12-15 hours later.

## Suitability:

Pre-calving dairy cows where additional calcium is required. Only administer to cattle weighing over 400kg live weight.

## Analysis per kg:

Calcium	34.15%
Iodine	250 mg
Zinc	6,000 mg
Selenium	33.50 mg
Vit D3	273,000 iu

## Unit Size:

12 x 155g Bolus  
Net Weight: 2.00kg  
Code: BOL.CUFCLBX
